30. A Village Design Statement (VDS) sets out clear and simple guidance for the design of all development in a village, based on its character. It is an advisory document produced by the village community, not by the planning authority. It will not stop change from happening, but it can help effect how any new building fits in to the village. VDSs are intended to influence the operation of the statutory planning system, so that new development is in harmony with the village's setting and makes a positive contribution to its environment. Do you think that a Village Design Statement would benefit Nettleham?:

| | | | |
