

NORTH SOMERCOTES PARISH COUNCIL

Environment Agency (EA) Donna Nook Realignment

Car Parking and Footpath changes

The EA will shortly be applying for an order to carry out the Footpath changes, and they also wish to consider how the new Car Park at Donna Nook could be managed.

Part of the scheme involves removing the existing car park reinstating the dunes and creating an improved car parking area. The Parish Council has been discussing with the Environment Agency how the new car park could be managed and whether other facilities could be provided (subject to necessary planning approvals). The Parish Council does not intend to manage or oversee the running of the Car Park, but this may provide an opportunity for people in the community to do so.

The Environment Agency would therefore be interested to hear from any individual or organisation who may wish to manage the car park or any additional facilities, if granted, once the scheme is completed.

Interested parties should contact Alison Hirst, Communications Business Partner at the Environment Agency by 31st March 2012 to register their interest either by email: alison.hirst@environment-agency.gov.uk, or post: Waterside House, Waterside North, Lincoln, LN2 5HA.
